Sprint 3 Plan

- User story 1: As a business, I want to be able to login and create products so customers can request them.
  - Task 1: Pull the old business login from the previous merges that got overwritten
  - Task 2: Successfully merge it into the main branch to bring back the business login page
- User story 2: As a customer, I want to be able to edit my account to fit any new information I might have.
  - Task 1: Create UI for entering new information
  - Task 2: Modify the pre-existing data on the MongoDB to reflect the change
- User story 3: As a business, I want to be able to see the products I listed.
  - Task 1: Copy over requestProducts
  - Task 2: Modify said page to filter products based on the businessID.
- User story 4: As a customer/business, I want to be able to make and login to the right type of account on ShopLink.
  - Task 1: Create a button that switches from customer to business and business to customer login site.
- User story 5: As a customer, I want to be able to see the list of products I requested.
  - Task 1: Create backend logic to display data
  - Task 2: Create UI to link the above logic to a page
- Team Roles
  - Bobby
    - Product Owner
    - Developer
  - Romeo
    - Scrum Master
    - Developer
  - Jeffrey
    - Developer
  - Joshua
    - Developer
  - Joey
    - Developer
  - Cooper

- ■ Developer
- ● Initial Task Assignment
  - ○ Configure AWS
    - ■ **Joshua**
  - ○ MyProducts page polishing
    - ■ Copy over requestProducts
    - ■ Modify said page to filter products based on the businessID.
    - ■ **Romeo**
