Sprint 1 Plan

- User story 1: As a customer, I want to be able to log in so that I may manage my account.
  - Task 1: Change the old business login to fit the client login
  - Task 2: Make sure client information gets saved correctly using http routes
- User story 2: As a customer, I want to be able to view all the products I can request so I may request desired products.
  - Task 1: Develop the UI to display products in a formatted way
  - Task 2: Develop backend logic to display products
- User story 3: As a business, I want to enter in a preview image for my business product so that I may market my product to customers better.
  - Task 1: Install a way for businesses to put image previews in for their products
- Team Roles
  - Bobby
    - Product Owner
    - Developer
  - Romeo
    - Scrum Master
    - Developer
  - Jeffrey
    - Developer
  - Joshua
    - Developer
  - Joey
    - Developer
  - Cooper
    - Developer
- Initial Task Assignment
  - Testing pre-existing http routes and integrating it to main working branch
    - Should be done first to support all other tasks
    - **Joshua**
  - Developing UI for "Request Products" page
    - Also linking UI buttons to the http routes to post/get information from MongoDB
    - **Jeffrey, Joey, Bobby**

- Bobby would be in charge of analyzing the pre existing infrastructure from the previous app
- Jeffrey and Joey would be in charge of analyzing what we can take from the UI website and what we need in general in order to portray products on the page
  - Developing backend part of "Request Products"
    - Get all products' information and portray them with the UI developed by above
    - **Cooper**
  - Image Database Storage
    - Install a way for businesses to input image previews of their products into MongoDB
    - **Joshua, Romeo**
  - Change business login to customer side login
    - The focus for now is on the customers, so we would need a way to track the customers' login information
    - **Romeo**
- Initial Scrum Board

User Stories	Tasks not started	Tasks in progress	Tasks Completed
- As a customer, I want to be able to log in so that I may manage my account. - As a customer, I want to be able to view all the products I can request so I may request desired products. - As a business, I want to enter		- Developing UI for request products page - Request Products backend content - Image Database Storage	- Testing pre-existing http routes - Change business login to customer login

in a preview image for my business product so that I may market my product to customers better.
